DAILY INTERNSHIP LOGBOOK / DIARY (KISHALAY SHARMA)

# / Date	Module & Topic	Work Performed & Practical Tasks	Tools Used	Key Learning Outcome	Hrs	Mentor Remarks & Sig
Day 1 2026-06-01 (Mon)	Core Curriculum Track Solar PV Fundamentals & Semiconductor Physics	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 2 2026-06-02 (Tue)	Core Curriculum Track Solar Geometry: Azimuth, Zenith & Sun Path Charts	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 3 2026-06-03 (Wed)	Core Curriculum Track Solar Irradiance, Peak Sun Hours (PSH) & Air Mass	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 4 2026-06-04 (Thu)	Core Curriculum Track Monocrystalline vs Polycrystalline vs Bifacial Panels	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 5 2026-06-05 (Fri)	Core Curriculum Track Rooftop Site Survey: Structural Load & Shading Obstacles	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 6 2026-06-06 (Sat)	Core Curriculum Track Civil Ballast vs Anchor Fastener Layout Calculations	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 7 2026-06-08 (Mon)	Core Curriculum Track Building Integrated Photovoltaics (BIPV) Facades	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 8 2026-06-09 (Tue)	Core Curriculum Track BIPV Architectural Glass & Thermal Dissipation	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)

Day 9 2026-06-10 (Wed)	Core Curriculum Track Module Mounting Structure (MMS) HDGI Assembly	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 10 2026-06-11 (Thu)	Core Curriculum Track Purlin, Rafter & Column Assembly Specifications	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 11 2026-06-12 (Fri)	Core Curriculum Track Mid-Clamps & End-Clamps Torque Tightening Protocols	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 12 2026-06-13 (Sat)	Core Curriculum Track Solar DC Cable Sizing & TUV 2 Pfg 1169 Standards	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 13 2026-06-15 (Mon)	Core Curriculum Track DC Array Junction Box (AJB) & Surge Protection (SPD)	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 14 2026-06-16 (Tue)	Core Curriculum Track MC4 Connector Crimping & Pull-Out Force Testing	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 15 2026-06-17 (Wed)	Core Curriculum Track String Inverter Architecture & Efficiency Curves	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 16 2026-06-18 (Thu)	Core Curriculum Track Maximum Power Point Tracking (MPPT) Multi-Channel Design	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 17 2026-06-19 (Fri)	Core Curriculum Track AC Distribution Board (ACDB) Wiring & Isolation MCBS	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 18 2026-06-20 (Sat)	Core Curriculum Track Grid Synchronization: Voltage, Frequency & Phase Matching	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)

Day 19 2026-06-22 (Mon)	Core Curriculum Track Chemical Earthing Pit Excavation & Bentonite Mix	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 20 2026-06-23 (Tue)	Core Curriculum Track Earth Resistance Testing with Fall-of-Potential (< 2 Ohm)	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 21 2026-06-24 (Wed)	Core Curriculum Track Early Streamer Emission (ESE) Lightning Protection	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 22 2026-06-25 (Thu)	Core Curriculum Track DC Isolators, Fire Safety & Rapid Shutdown Protocols	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 23 2026-06-26 (Fri)	Core Curriculum Track Insulation Resistance Testing (Megger 1000V DC)	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 24 2026-06-27 (Sat)	Core Curriculum Track Open-Circuit Voltage (Voc) & Short-Circuit (Isc) Verification	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 25 2026-06-29 (Mon)	Core Curriculum Track DISCOM Net-Metering Bi-Directional Meter Setup	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 26 2026-06-30 (Tue)	Core Curriculum Track Solar SCADA Telemetry & Remote Inverter Monitoring	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 27 2026-07-01 (Wed)	Core Curriculum Track Preventive Cleaning Protocols & Deionized Water Systems	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)
Day 28 2026-07-02 (Thu)	Core Curriculum Track IV-Curve Diagnostics & Degradation Rate Analysis	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrate d. (Verified)

Day 29 2026-07-03 (Fri)	Core Curriculum Track Thermal Hotspot Detection via Infrared Thermography	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 30 2026-07-04 (Sat)	Core Curriculum Track BIPV Power Loss Minimization & Shading Bypasses	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 31 2026-07-06 (Mon)	Core Curriculum Track Commercial 50 kWp Rooftop Installation Case Study	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 32 2026-07-07 (Tue)	Core Curriculum Track Safety Gear: Full-Body Harness, Static Life Lines & PPE	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 33 2026-07-08 (Wed)	Core Curriculum Track Single Line Diagram (SLD) Drafting & Bill of Materials	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 34 2026-07-09 (Thu)	Core Curriculum Track Techno-Commercial Plant Inspection & Quality Punch-Lists	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 35 2026-07-10 (Fri)	Core Curriculum Track DISCOM Grid Compliance & Handover Documentation	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
Day 36 2026-07-11 (Sat)	Core Curriculum Track Final Practical Commissioning & Performance Ratio Defense	Work: Completed structured exercises and hands-on laboratory implementation. Practical: Executed practical lab assignments and field exercises.	PVsyst / AutoCAD Solar / Fluke Solar Testers / Clamp Meter	Attained verified technical competency and applied problem solving.	3.5 h	Satisfactory progress and active participation demonstrated. (Verified)
